PRESENTATION ABSTRACT

The Dr. is in: A roundup of GIS for Health Applications

The power of maps and GIS can be used for many health-related purposes, from individual patients to tracking global disease.

Blue Raster supports many health organizations, including USAID, WHO and The American Academy of Family Physicians among others.

Learn how maps and applications are being used to improve health outcomes and track disease around the world.

BIO

Phil Satlof is a Program Manager with Blue Raster ,based in Arlington, VA.

Blue Raster works with purpose driven, passionate and diverse groups every day to bring custom solutions to some of the world's most difficult problems through the power of maps and GIS.

Phil has nearly 20 years of experience in the map/GIS/cartography business and began his career working on paper street atlases.

In more recent times, Phil has helped clients as varied as USAID, WHO, WRI, Columbia University and others to visualize data and find answers with maps and GIS.
