

Stephen Johnson

Founder

Glacier Peak Studios

PRESENTATION ABSTRACT

BIO

Stephen founded Glacier Peak Studios in 2013 where he created Topo Maps+, a leading outdoor app for iPhone, iPad, Apple Watch, and Mac. Stephen started working on Topo Maps+ in 2011 so that he could plan backpacking trips and print maps from his iPad and iPhone. At the time he was the CTO at another mobile app startup and I had been involved in mobile apps since before iPhone and Android. Since launching Topo Maps+ it has been featured in Apple's curated categories for "Apps for the Great Outdoors", "Apps for Outdoor Adventures", "Apps for Hiking and Camping", "Offline Hiking and Travel", "Get Outside", and "Apps for Planning Your Summer Vacation".
